

COVID-19 EXIT

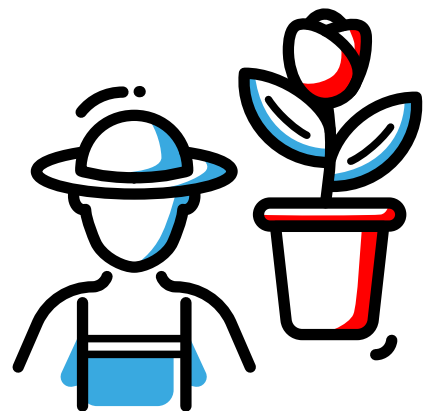

The first phase consists of the resumption of the following activities:

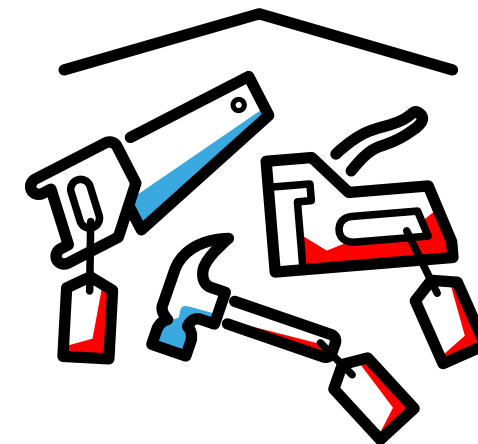

1. Reopening of construction sites

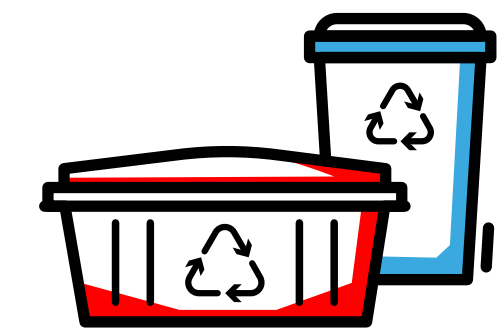

2. Assistance and psychosocial support services in education

3. Activities of gardeners and landscapers

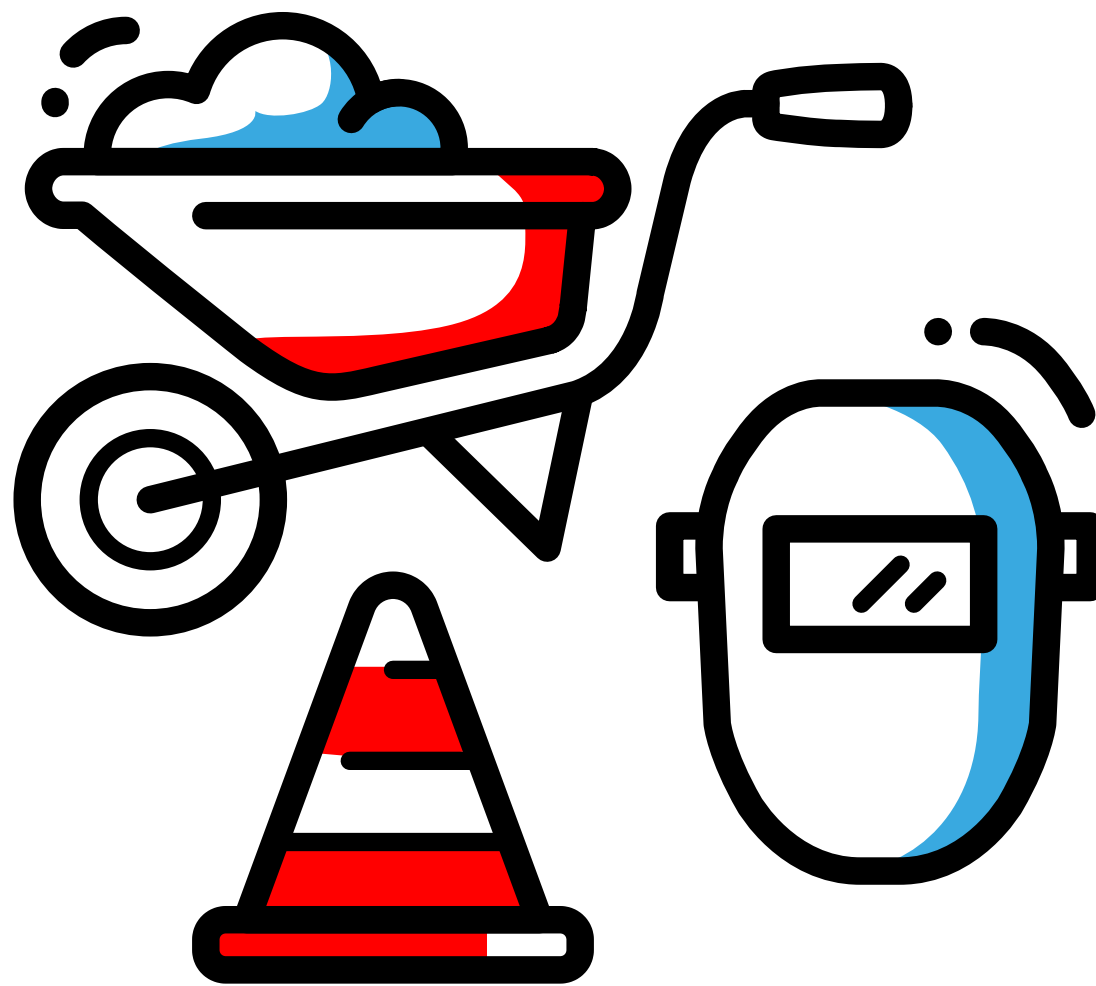

4. Businesses whose main activity is do-it-yourself

5. Reopening of recycling centres

This list will be completed on May 4 by the resumption of the final classes, as well as internships and practical work at the level of BTS and the university. Given the limited number of students affected by this measure, compliance with strict barrier measures seems manageable.

COVID-19 | **EXIT**
