

WHAT IS PHASE 2 OF DECONFINEMENT?

Following the first phase, essentially aimed at reactivating the construction sector, phase 2 of the deconfinement proposes new measures for **a gradual exit from the state of confinement, which is subject to strict compliance with sanitary measures and barrier gestures as of May 11th.**

Thus, the following activities are again authorized:

#BleiftDoheem

Even if **the confinement** (#BleiftDoheem) **is no longer a legal obligation**, it is nevertheless recommended.

Visits or meetings of a private nature organized at home for a maximum number of six people, in addition to the people already living in the same household under the strict respect of sanitary measures (interpersonal distance of 2m / wear of masks).

Outdoor sports activities without physical contact, of a non-competitive nature and without an audience. Public swimming pools remain closed.

Outdoor gatherings in a public place for a maximum number of twenty people under the strict respect of sanitary measures (interpersonal distance of 2m / wear of masks).

Re-opening of shops (with exceptions).

Re-opening of the National Archives, public libraries, museums, exhibition centers.

WHAT ARE THE GOOD REFLEXES TO ADOPT?

The success of the deconfinement strategy is based on 3 key principles: **personal responsibility, solidarity with others and discipline.**

Be responsible!

Even if the confinement (#bleiftdoheem) is no longer a legal obligation, it is nevertheless recommended to **limit your interpersonal contacts and your movements to the necessary.** This is still the best way to protect yourself and your loved ones.

Show solidarity!

The mask only protects you to a limited extent against infection, but **your mask protects those around you.** This helps you limit the spread of the virus in the population. Remember to especially protect vulnerable people. **#NotWithoutMyMask**

Be disciplined!

Personal responsibility and solidarity with your fellow citizens are additional barrier gestures.

Don't forget the traditional barrier gestures: wash your hands, keep an interpersonal distance of 2m, etc.
